

World Student Environmental Summit PUBLIC PROGRAMME
5-8 September 2012 – University of Lausanne (Switzerland)
 Version of August 27, 2012/cm

The 2012 summit in Lausanne is organised around the theme "*Let's change!*" It is obvious nowadays that without a radical change in the behaviour of mankind, the environment - and by way of consequence, mankind itself -, will undergo irreversible damage.

“The change” will be addressed at three levels, corresponding to the three Summits' days : societal, international and individual. At each level we will discuss the potential and limits of different concepts, movements, strategies and development models towards change. We will discuss obstacles, illusions, difficulties but also the solutions and actions that we can be taken.
